# EDITORIAL

Digitalization, communication, and marketing remain our priority in 2026, strengthening technological integration with our customers and improving the agility of our processes and services.

## **API CONNECTIVITY**

This year we place special emphasis on the implementation of our API as a key element to ensure that our distributors' databases are permanently aligned with the information on our website. This connectivity allows catalogs to be kept automatically updated, avoiding inconsistencies, reducing errors, and eliminating the risk of lost sales due to outdated information.

## **CATALOG EXPANSION**

We are working to offer specific products for Asian brands that are gaining excellent market acceptance, thereby expanding our model coverage and strengthening our competitiveness in the fastest-growing segments.

## **DIGITAL ECOSYSTEM AND PLATFORM**

We continue to optimize our web and B2B platforms, enhancing user experience and brand visibility, while maintaining our commitment to innovation and the technical development applied to our products.

## **GRAPHIC IDENTITY AND BRAND CONSISTENCY**

Throughout this year, work will be carried out on the creation of a global style guide for all Puig graphics, with the aim of ensuring a homogeneous and coherent image across all documentation, commercial materials, and brand communication in every market.

## **COMMUNICATION AND MARKETING**

In digital communication, we focus on visual and multimedia content that facilitates technical product understanding and strengthens its dissemination across digital environments and social media. Likewise, we will expand and reinforce cooperation with collaborators and brand ambassadors to help boost Puig's visibility and strengthen our presence and influence across different markets and communication channels.

True to our close collaboration with top-level racing, we continue to be present at the highest level of world motorcycling. This season we support **Honda HRC** in MotoGP and **Bimota** by **Kawasaki Racing Team** in the World Superbike Championship, among other teams.

Competition remains our main laboratory, where we develop technical and aerodynamic solutions already applied to the products in this new catalog, with a clear objective: to continue fighting for a new world title.

Highlights of some **2026 new products** featured in the catalog:

- **SUPERIOR FRONT AREA:** Spoilers D12 (p. 39), Rally Screen (p. 53).
- **HANDLEBAR AREA:** MP25 Rearview Mirror (p.138), Bladed Rearview Mirror (p. 139), Crono Rearview Mirror (p. 162).
- **GAS TANK AREA:** PRO Tank Protector 2 (p. 186).
- **MIDDLE FRONT AREA:** Mist Auxiliary Lights (p. 224), Turn Signals Flow / Infinite (p. 234).
- **CHASSIS-ENGINE AREA:** Footpegs Evolution (p. 272), Frame Sliders R25 (p. 292).
- **WHEELS AREA:** Brake Cooler 2.0 (p. 303), Aero Wheel Deflector (p. 304), Air Duct (p. 305), Rear Paddock Stand for Conventional Swingarm FM1 (p. 328), Stand for Single-Sided Swingarm ST1 (p. 328), Rear Aluminium Stand for Conventional Swingarm HL1 (p. 329).

We thank you for the trust you place in our brand, the driving force that pushes us to keep growing and evolving every year. Thank you for staying with us one more year.

# Timeline

PUIG HI-TECH PARTS

1964-2025

1964

**Workforce:**  
3 Workers

**Infrastructures:**  
100m<sup>2</sup> - 1 Location

**Main Product:**  
Touring Fairing

**Technology:**  
Fiberglass -  
Manual processes

**Countries where it is sold:**  
Spain

**COMPANY FOUNDATION:  
"PUIG FAIRINGS"**

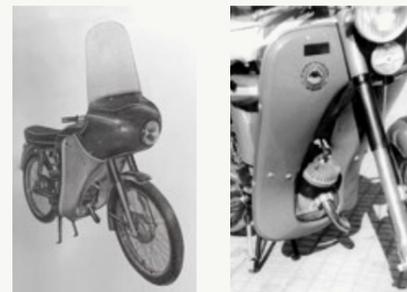

In the garage of their house in Granollers, Spain, the brothers Josep and Jaume Puig founded the company "Carenados Puig" as a result of their motorcycle passion, only 100m<sup>2</sup> that saw the birth of a dream, making motorcycle fairings.

The two founders were Derbi workers, and they materialized their dreams by turning their passion into their work.

On the left of the image we see Josep Puig, who is in charge of the commercial part of the company, and on the right Jaume Puig, responsible for the technical part and the design of the pieces.

Photographed on a competition Montesa 250cc with Puig fairing and screen in Granollers, very close to where the company's headquarters are currently located.

1967

**NEW PRODUCTS**

TOURING FAIRING for DERBI 49CC  
"LEG SHIELD" for DERBI 49CC

**PRODUCTION PHASES**

1. Design and prototypes
2. Molds
3. Paint the mold with gelcoat
4. Layering of Polyester fiber
5. Demould and polish --- Finished part

1 2 3 4 5

1980

**EXPANSION OF THE FACILITIES WITH THE NEW SECTION OF POLITÉ SHEET BLOW MOLDING AND LAMINATING**

A new blow molding section is commissioned to serve the Puch of Gijón brand and the sheet extrusion machine is used to produce the thermoformed semi-fairings and windshields for the Derbi and Vespa.

1985

**THE RANGE OF PRODUCTS IS EXPANDED**

The new blow-moulding machinery allows closed shapes to be created that are empty on the inside, and that in turn be able to manufacture tanks and boxes for transporting objects.

Europa II Fairings are designed and built for the Yamaha XS400 and XJ650. These were the first complete fairings to incorporate aerodynamic protection for the rider's legs, arms and torso, thanks to the wraparound fiber part and the large screen.

EUROPA II FAIRING for the Yamaha XJ650

M6 trunk made of plastic

Fuel tank for Montesa Cross-Enduro

1996

**NUMERICAL CONTROL INCORPORATION**

First 5-Axis robot.

The manufacture of polyester fiber is a very traditional process that does not allow meeting the growing demand and it is decided to promote thermoforming and pressing. More industrial processes to be able to manufacture more standardized parts and meet demand.

The production of fairings in polyester fiber is abandoned, and focuses on the design and manufacture of screens in acrylic material.

**EXPANSION TO THE USA – PUIG USA Inc**

New distribution warehouse.

With the firm desire to open Puig brand to the American and South American markets by offering great service and competitive delivery times, a new headquarters is opened in Orlando (Florida) from where Puig products can be shipped to these markets.

Remodeling of the Puig headquarters in Granollers.

2024

**LAUNCH OF THE NEW WEBSITE AND B2B**

We have launched our new website and updated the B2B platform, which includes new features such as navigation by motorcycle type, product area, and functionality.

You can now discover the best-selling products by category, the most popular ones, enjoy faster navigation, and many other new features.

**60TH ANNIVERSARY CELEBRATION**

On October 18th, 2024, Puig celebrated its 60th anniversary at Rocco's Ranch with a heartfelt event that reviewed its history and honored the work of the entire team.

The evening featured a historical journey, flat track and trial exhibitions, and the presence of iconic motorcycles. Jaume Puig shared the company's story, paying tribute to his brother Josep.

The night ended with a commemorative cake, a flat track show, and fireworks. An unforgettable event that reaffirms Puig's legacy in the motorcycle world.

2025

# PUIG STRENGTHENS ITS PRESENCE IN EUROPE WITH A NEW CENTER IN GERMANY

Since May 2025, **Puig** has been driving its European expansion with the opening of a logistics center in Cologne, Germany. This strategic move goes beyond distribution, reinforcing the brand's commitment to faster, closer, and more efficient service in one of the key markets of European motorcycling.

With **2,200 m<sup>2</sup>** dedicated to its extensive range of accessories—from wind-screens and mirrors to levers and engine protectors—the new **Cologne** warehouse optimizes delivery times throughout Ger-

many. As stated by **Joan Puig Gratacós**, CEO of **Motoplastic SA**:

*"The opening of the warehouse in Germany will allow us to take the Puig brand to the next level in this key market, compete on equal terms with local suppliers, and be even closer to our customers."*

Germany was chosen due to its role as Europe's industrial heart and its deeply rooted motorcycle culture,

where quality, innovation, and design—core values for Puig—are especially valued.

This new chapter is led by **Albert Puig**, representing the third generation of the family, with the aim of listening directly to German riders and evolving the product offering based on their feedback.

More than a logistics center, the Cologne warehouse symbolizes greater proximity to riders and lays the groundwork to become a strategic hub serving other European markets in the future. Broader reach, always closer to the user.

MOTOPLASTIC, S.A. DIESEL STR., 8 50859, KÖLN Germany

# PUIG COLLABORATORS

At Puig, we continuously work on developing innovative products designed to enhance the functionality, performance, and riding experience of your motorcycle.

For this reason, we have created this tool to build a database of riders who wish to collaborate with us in the development and testing of new products.

By completing the form, your motorcycle will be registered in our database, and we may contact you if we require a model like yours for future projects.

**1** Try our prototypes

**2** Give us your feedback

# BMW R1300GS

The **PISTA KIT by Puig** is a body kit designed for the BMW R1300GS, allowing its transformation into a high-performance hybrid motorcycle for street or track use with minimal modifications. Unlike conceptual projects such as the Diablo and Diablo X, the goal of the PISTA is to offer a set of marketable and functional parts that enhance the riding experience.

Optimized aerodynamics with front spoilers, side deflectors, and strategic covers.

Improved performance and safety thanks to components such as the brake cooler, skid plate, and sporty fenders.

Greater versatility: a balance between the adventurous spirit of the R1300GS and the agility of a track bike.

#2

# SPORT SCREEN

The Sport screen of the **KIT PISTA** combines sporty aesthetics with functionality, improving aerodynamic protection compared to the original windscreen while providing a more aggressive design.

Its lateral ribs channel the airflow and, together with the headlight protector, help reduce turbulence and improve aerodynamic flow.

Manufactured from 3 mm Cl30 acrylic, it is resistant, durable, and TÜV approved.

**Sport Screen**

# HEADLIGHT PROTECTOR

The Puig headlight protector from the **KIT PISTA** features an exclusive Z-Racing design, more aggressive and sporty than the original.

In combination with the windscreen, it creates an aerodynamic channel that reduces turbulence and wind noise at high speeds.

Manufactured from 3 mm high-impact acrylic, it offers excellent resistance, durability, and optimal lighting performance.

Ⓜ Clear

**Front Fender**  
REF. 22309J

**J (\*)** \* Check price with your distributor.

**Brake Cooler**  
REF. 22308J

They enhance the performance of the BMW R1300GS in sporty and track riding.

The **KIT PISTA** brake cooler features a ducting system that channels air directly to the calipers and brake pads, ensuring more stable and consistent braking even under intensive use.

The **KIT PISTA** front fender optimizes aerodynamics by reducing turbulence and improving stability at high speeds.

Both components combine lightness, strength, and an aggressive aesthetic perfectly integrated into the overall design.

#4

#5

**Front Spoiler**  
REF. 22310J

**J (\*)** \* Check price with your distributor.

# FRONT SPOILER

The **KIT PISTA** front spoiler radically transform the bike's aesthetics with an aggressive and sporty design.

They generate up to 5.4 kg of down-force on the front axle, improving stability, braking performance, and preventing wheelies at high speeds.

Manufactured from high-end ABS with metal brackets, they combine lightness, strength, and a matte black racing finish.

**J** Matt Black

# ENGINE SPOILER

Inspired by BMW's sporty boxer models, the **KIT PISTA** engine spoiler delivers an aggressive, racing-inspired design.

It protects the lower part of the engine, improves cooling efficiency, and highlights the exhaust headers.

Manufactured from high-end ABS with aluminum brackets, it is lightweight, durable, and easy to install.

## Engine Spoiler

REF. 22307 J/N

**J N (\*)** \* Check price with your distributor.

**J** Matt black

**N** Black

# LOWER SPOILER

Inspired by MotoGP, the **KIT PISTA** lower spoiler improves aerodynamics and reinforces the sporty character of the BMW R1300GS.

Its double-surface design generates 0.35 kg of downforce on the rear end, increasing stability, braking composure, and confidence when cornering.

Manufactured from ABS and 3 mm aluminum, it combines lightness and strength with a matte black finish.

## Lower Spoiler

REF. 22304N

**N (\*)** \* Check price with your distributor.

**N** Black

# LOWER DEFLECTORS

The Puig Lower Deflectors of the **KIT PISTA** feature a three-position adjustable system that allows airflow to be adapted according to temperature and rider needs. In winter, they channel engine heat toward the legs, while in summer they block hot air to improve comfort.

Manufactured from 4 mm acrylic with metal brackets, they combine strength and functionality, enhancing both aesthetics and comfort on long rides.

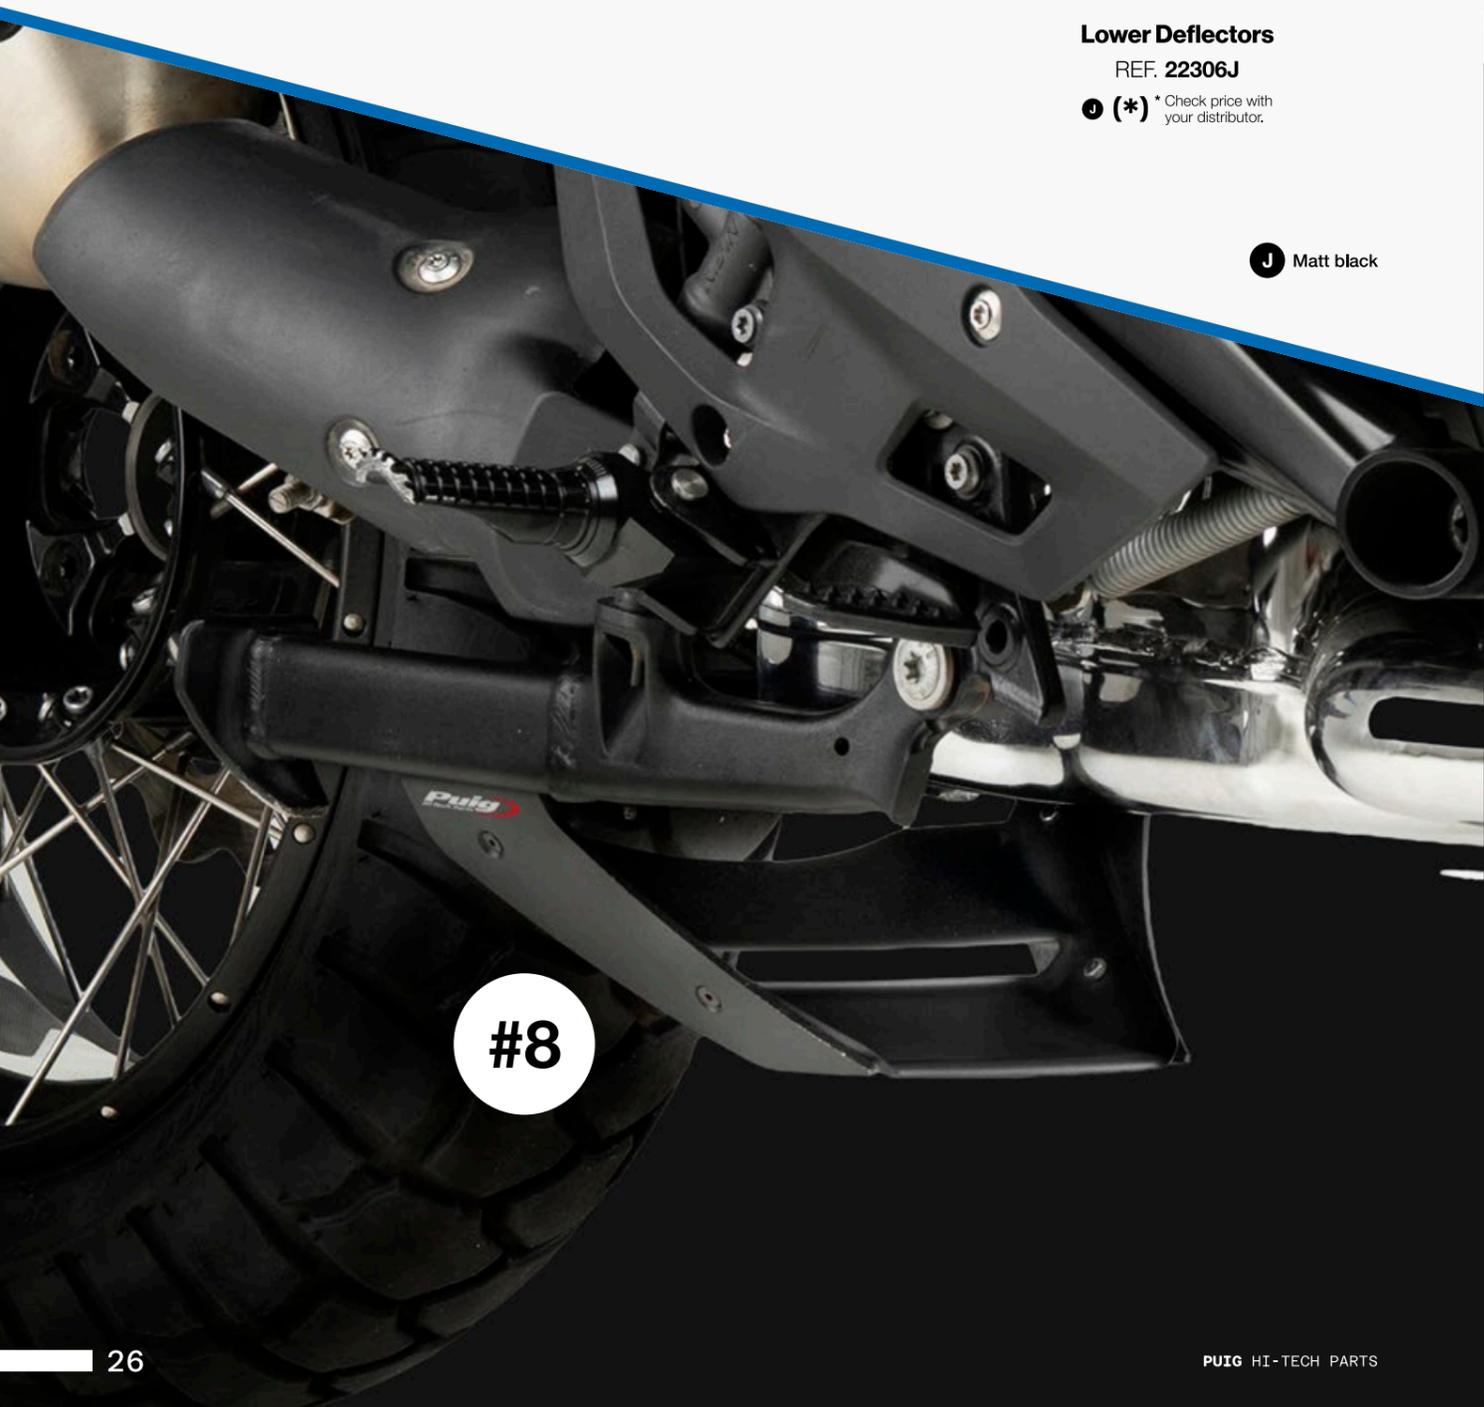

## Lower Deflectors

REF. 22306J

Ⓝ (\*) \* Check price with your distributor.

Ⓝ Matt black

# REAR SEAT COWLS

The **KIT PISTA** Rear Seat Cowl replaces the passenger seat and delivers a design clearly inspired by racing. It streamlines the rear end, reinforces the sporty character, and improves rider support during fast riding.

Manufactured from 3 mm technical ABS, it combines lightness and strength. Installation is straightforward and retains the two original seat positions.

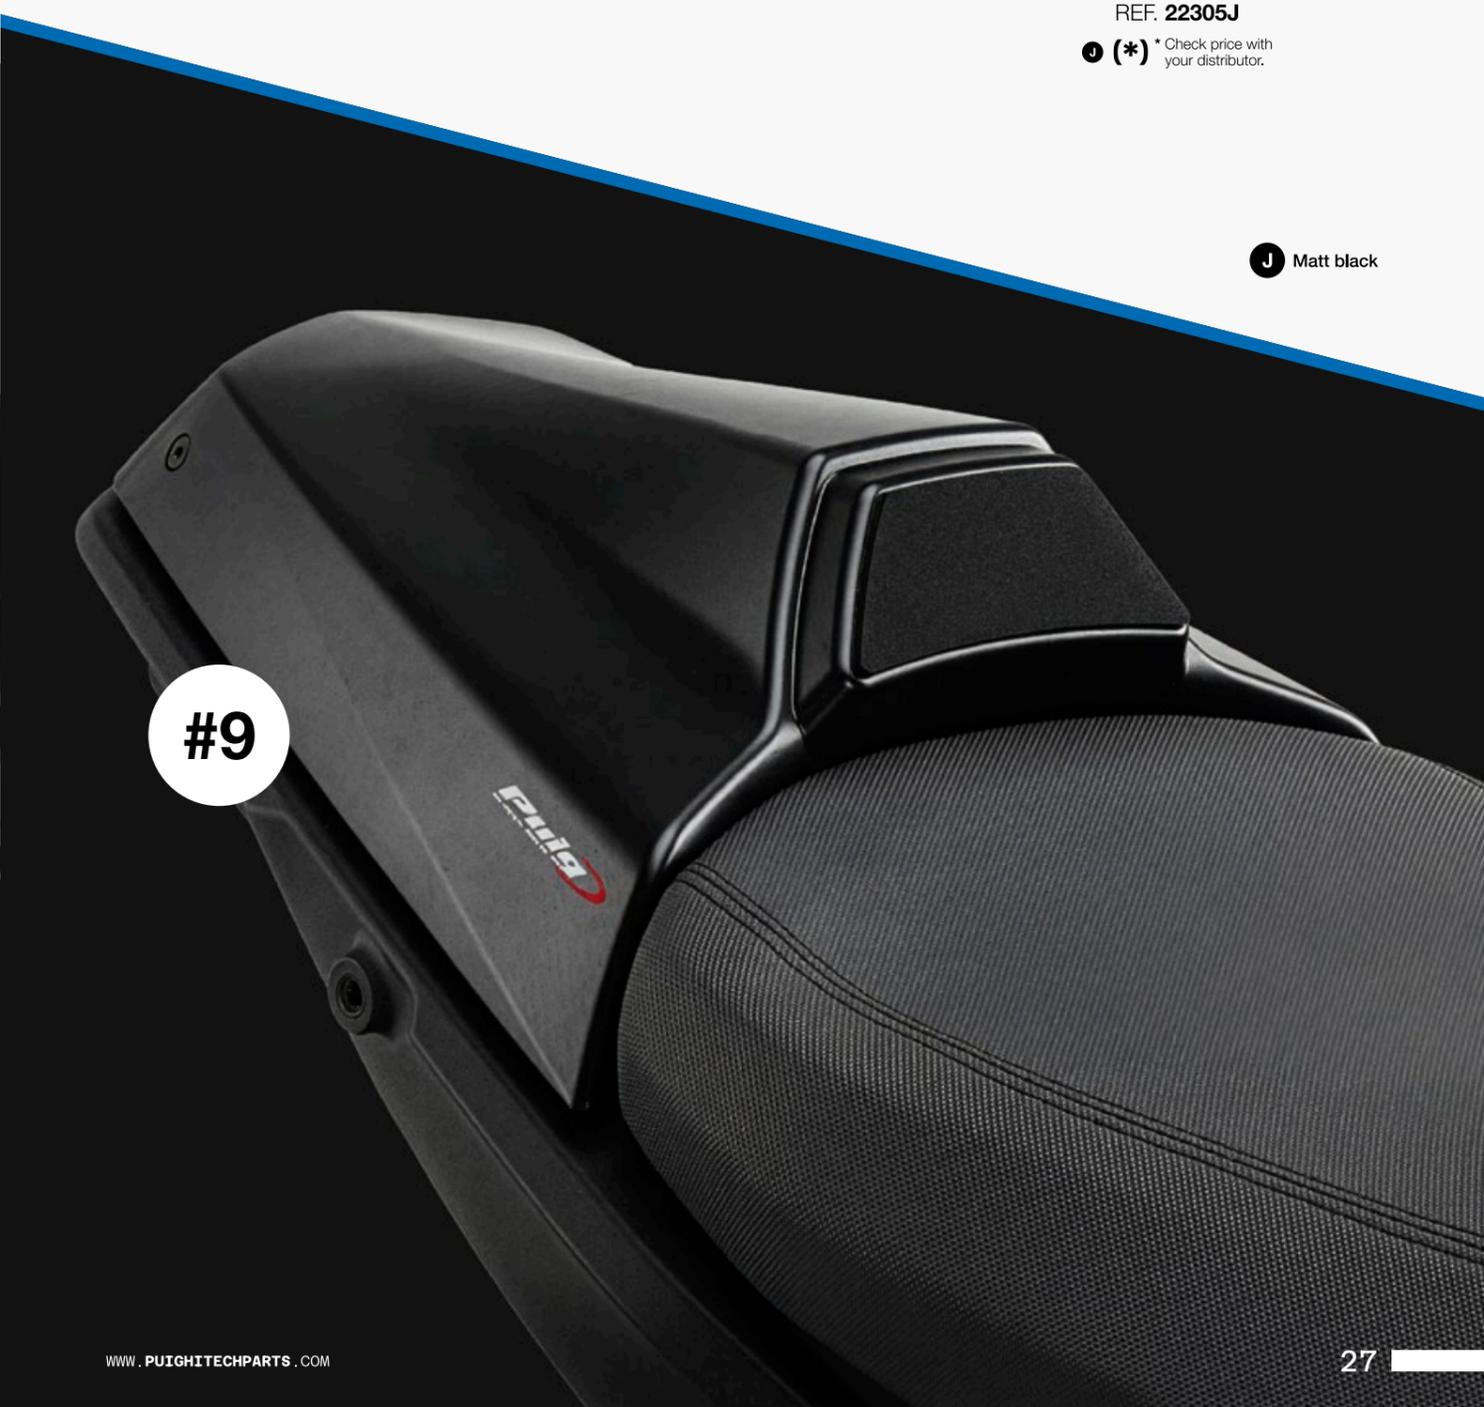

## Rear Seat Cowls

REF. 22305J

Ⓝ Matt black

# REAR COVER

The **KIT PISTA** rear cover replaces the passenger seat, delivering a true sporty single-seat look.

Manufactured from ABS, it streamlines the rear section with a minimalist and aggressive design, perfectly aligned with the subframe.

It includes a neoprene area to improve rider support and comfort during sporty riding. Additionally, it offers internal space for storing small items, combining functionality with a racing aesthetic.

J Matt black

**Rear Cover**

# TANK COVER PROTECTOR

The **KIT PISTA** tank cover protector replaces the original soft material part with a rigid ABS surface that enhances rider grip and control by improving contact with the motorcycle.

Manufactured in ABS, it increases hold between the legs and facilitates movement during sporty riding.

In addition to its functional benefits, this cover visually transforms the tank and offers multiple customization options: it can be painted, wrapped, or adapted according to each user's preferences, making it an ideal base for a unique style.

# DIABLO MIRROR

## Diablo Mirror

R - REF. 22594N  
L - REF. 22595N

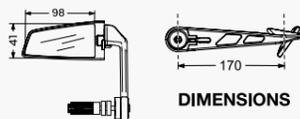

(\*) \* Check price with your distributor.

The Diablo Mirror from the **KIT PISTA** integrates mirror, winglet, and protector in a single piece installed at the end of the handlebar.

Its folding system allows the mirror to convert into an elegant winglet, providing versatility and a unique design.

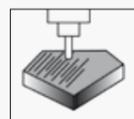

Manufactured from high-quality materials, it combines strength, functionality, and an aggressive aesthetic that reinforces the sporty character of the **KIT PISTA**.

DIMENSIONS

**ADJUSTABLE**  
Inclination and height.

**MATERIAL**  
Manufactured from billet aluminium and anodized.

(N) Black

# LICENSE PLATE HOLDER

## License Plate Holder

REF. 22350N

(\*) \* Check price with your distributor.

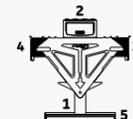

The rear license plate cover of the **KIT PISTA** replaces the original holder, visually cleaning up the rear section of the motorcycle.

Its three-dimensional design, with continuous surfaces and smooth transitions, ensures a precise fit beneath the tail section, fully covering the exposed structural mounting points.

Manufactured from 4 mm matte black ABS, it combines lightness, strength, and a minimalist aesthetic.

Easy to install, it reinforces the sporty and competitive character of the BMW R1300GS.

**KIT**  
It is supplied with light and reflector, both homologated. According to models.

**ADJUSTABLE**  
Fixed or adjustable on inclination.

**TURN SIGNALS**  
Adjustable lodge for turn signals.

# DOWNFORCE SPOILERS RACE

\* Check availability for motorcycle models at [www.puigtechparts.com](http://www.puigtechparts.com) typing in the searching window: **RACE SPOILERS**

They are made up of two elements:

- Supports injected in flexible black plastic that adapt perfectly to the fairing of your motorcycle by means of a 3M dual lock adhesive, strong, resistant and durable, but that can be removed and does not damage or require holes in your fairing.
- Spoiler in closed form, which is made of 4 mm acrylic material. To choose a color, following safety regulations, with rounded edges with a radius >2 mm, a highly rigid and light material that is perfect for receiving aerodynamic pressure and directly translating it into downforce.

This product, extracted from the experience of the brand in the Moto GP championship, manages to provide greater air pressure in the front end in high-speed sections and improve cornering.

**STABILITY**

More stability when changing direction.

They are made up of two elements:

- 2 mm metal brackets with a textured black finish, designed to provide a firm and secure fit with no complications. They are easy to install by following the included instructions, with no prior mechanical knowledge required.
- 4 mm CN acrylic side spoilers, with rounded edges for improved safety. Their innovative dual-wing design, separated by a lateral winglet, has been developed to optimize airflow and generate greater aerodynamic load without penalizing the drag coefficient.

The carefully studied angle of the surfaces allows up to 4.4 kg of downforce on the front axle, delivering a noticeable anti-wheelie effect, greater high-speed stability (anti-shimmie), improved braking performance, and increased precision when changing direction.

Designed and manufactured entirely in Barcelona, they combine advanced engineering with racing aesthetics, ensuring optimal performance on high-performance motorcycles. It is recommended to check the ABE to confirm compatibility with your motorcycle.

# Z-RACING WINDSCREEN

\* Check availability for motorcycle models at [www.puigitechparts.com](http://www.puigitechparts.com) typing in the searching window: ZRACING

REF. 20541H

The Z-Racing windscreen reaches the perfect equilibrium between an sportive design and an increase on aerodynamic protection for the rider.

Higher than the oem, its studied shapes include edges to divert the airflow to the sides, avoiding the impact on the helmet and superior part of the riders torso.

Manufactured in 3 mm high-impact acrylic assuring excellent durability and a perfect optical vision. The edges are 2 mm rounded to comply with the german TÜV regulation.

Available in a wide color selection.

**NOTE: to replace or change the screws of the windscreen, please check page 55.**

# TOURING WINDSHIELD

\* Check availability for motorcycle models at [www.puigtechparts.com](http://www.puigtechparts.com) typing in the searching window: **TOURING**

REF. 21393H

The Touring windshield is the ideal accessory for riders searching to increase the aerodynamic protection without compromising the field of vision.

Its modern style perfectly adapts to the design of the Adventure bikes. Moreover, it is available in clear, light smoke, dark smoke and black for a better personalization.

Developed through our virtual wind tunnel, it is designed with a V shape to divert the airflow through the sides in a clean way, without turbulences and annoying noises, avoiding the impact to the helmet and superior part of the torso.

Manufactured in 4 mm high-impact acrylic assuring excellent durability and a perfect optical vision. The edges are 2 mm rounded to comply with the german TÜV regulation.

If you are searching for more protection, Puig offers multi-adjustable visors which can be mounted on oem or our windshields. Please check our catalog on **page 58-61** or our site [www.puigtechparts.com](http://www.puigtechparts.com) to see the recommended visor for your motorcycle.

**NOTE:** to replace or change the screws of the windscreen, please check **page 55**.

For certain specific models, PUIG offers a reinforcement bracket that provides greater rigidity to the windscreen assembly.

# TOURING SCREEN WITH VISOR

\* Check availability for motorcycle models at [www.puigtechparts.com](http://www.puigtechparts.com) typing in the searching window: **VISOR TOURING**

REF. 3818H

Touring screen with multi-adjustable visor fixed by screws incorporated as standard. This way the rider can choose at any time, quickly and easily if he needs extra aerodynamic protection.

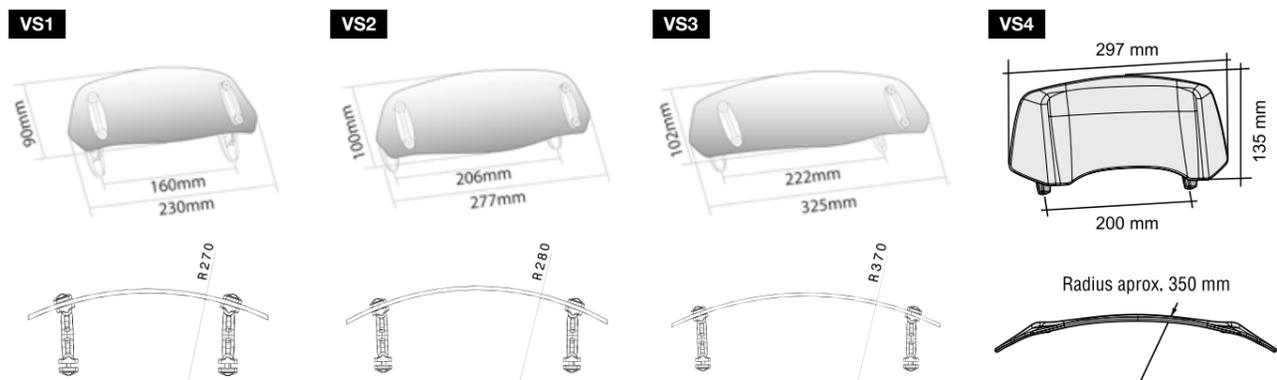

Larger than the original screen, it is developed with wind tunnel technology. It includes a V-shaped design to divert the air to the sides cleanly without turbulence and annoying noise, preventing it from impacting the head and rider's torso, therefore improving riding comfort and reducing fatigue.

Made of 4 mm thick acrylic material, offers excellent strength and transparency. It has 2 mm rounded edges, for greater safety, complying with the German TÜV regulations. Available in smoke to match the visor.

**NOTE:** to replace or change the screws of the windscreen, please check page 55.

THERE ARE FOUR MODELS OF VISORS AVAILABLE DEPENDING ON THE SCREEN:

# TOURING PLUS SCREEN WITH VISOR

\* Check availability for motorcycle models at [www.puigtechparts.com](http://www.puigtechparts.com) typing in the searching window: **VISOR PLUS**

REF. 20816H

It further increases the aerodynamic protection of the Touring Plus screen by incorporating a multi-adjustable visor fixed by screws. Ideal for taller riders looking for better protection in the helmet area.

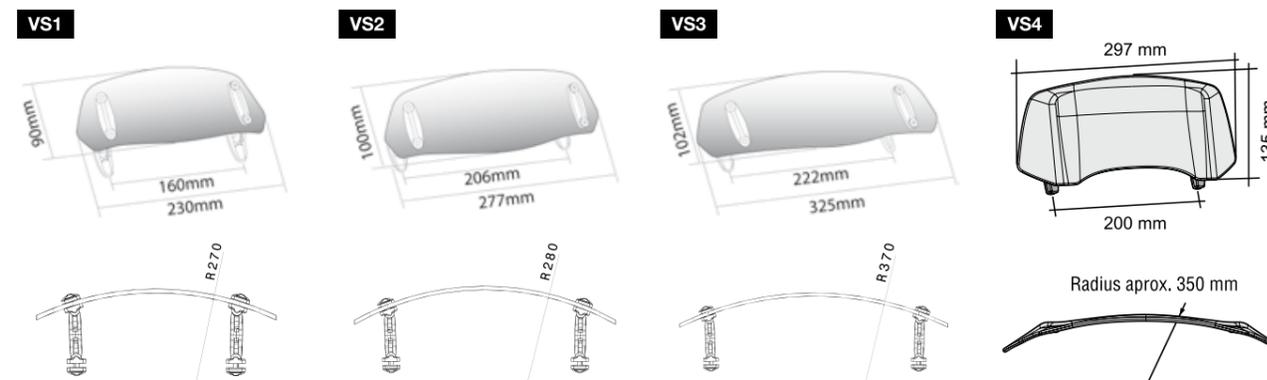

Larger than the original screen and the Puig Touring model, it is developed with wind tunnel technology with a V-shaped design to divert the air to the sides cleanly without turbulence and annoying noise, preventing impacts to the rider's head and upper torso. It improves riding comfort and reduces fatigue.

Made of 4 mm thick acrylic material, offers excellent strength and transparency. It has 2 mm rounded edges, for greater safety, complying with the German TÜV regulations. Available in smoke to match the visor.

**NOTE:** to replace or change the screws of the windscreen, please check page 55.

# ADJUSTABLE WINDSCREEN

\* Check availability for motorcycle models at [www.puigitechparts.com](http://www.puigitechparts.com) typing in the searching window: **ADJUSTABLE SCREEN**

REF. 3179H

Aerodynamic test delivered with almost all our screens.

**NOTE: to replace or change the screws of the windscreen, please check page 55.**

Thanks to the incorporation of an adjustable mechanism, the height of the screen can be raised quickly and easily, immediately adapting to the needs of each situation and type of ride like off road, city, highway...

Larger than the original screen, this versatile screen has been designed and developed with wind tunnel technology, which diverts the air to

the sides cleanly without turbulence and annoying noise, preventing it from impacting the head and the rider's upper torso. This will improve the rider's riding comfort and reduce fatigue.

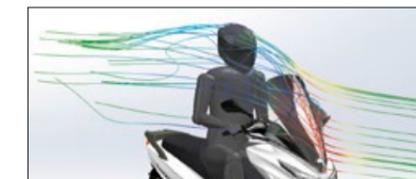

Made of high impact methacrylate, it offers excellent strength and transparency. It has rounded edges for greater rider safety. Available in several shades to better match your motorcycle.

# RALLY SCREEN

\* Check availability for motorcycle models at [www.puigtechparts.com](http://www.puigtechparts.com) typing in the searching window: RALLY SCREEN

**New!**

REF. 22647W

The Puig Rally Screen has been designed for off-road use, combining protection, functionality, and aesthetics. It provides additional protection for devices such as tablets, GPS units, or roadbooks, and shields the headlight from impacts without affecting aerodynamics.

Its design integrates the screen and headlight protector into a single piece, with lines that fit perfectly into the motorcycle's front end. It features upper deflectors that improve airflow while delivering a sporty yet discreet style.

Available in a clear finish.

# SEMIFAIRING RALLY

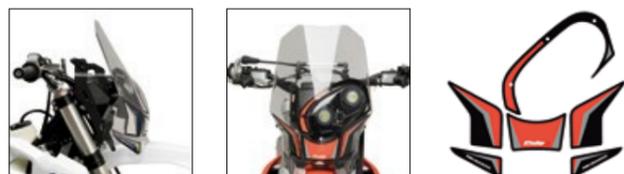

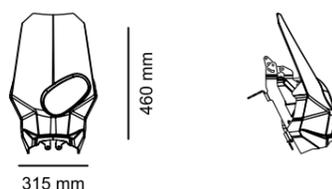

\* Check availability for motorcycle models at [www.puigtechparts.com](http://www.puigtechparts.com) typing in the searching window: RALLY

REF. 21903W

The Rally semifairing is a complement for your off-road motorcycle that will allow you to:

- Improve aerodynamics thanks to the polycarbonate screen that redirects the air, improving the rider's protection.
- Improve lighting thanks to two LED headlights if we compare them to the originals of the motorcycle.
- Install the navigation system that best suits your needs, such as a Roadbook, Mobile Phone or a GPS and adjust it to the position you want, resisting the bumps and jumps that may occur when on the road. It should also be noted that your navigation system will be 100% protected by the screen from possible impacts, stones, dust...

The semifairings are served with an adhesive kit that uses the same aesthetic and colors as the motorcycle.

# HIGH-ROAD SCREEN

\* Check availability for motorcycle models at [www.puigitechparts.com](http://www.puigitechparts.com) typing in the searching window: HIGHROAD

Designed to offer better aerodynamic protection to Custom and Cruiser style motorcycles that have the original front fairing. With elegant and sober shapes, it adapts perfectly to the attractive aesthetics of this type of motorcycle.

Two versions are available, Sport and Touring, with 223 mm and 323 mm height respectively, so that each user can choose the one that best suits their riding needs.

Thanks to its design study developed with wind tunnel technology, the High-Road screens are

more incline to bring them closer to the driver, cleanly diverting the frontal air stream that would impact the rider directly, eliminating annoying turbulence and vibrations on the helmet. It will significantly increase riding comfort and reduce fatigue to enjoy longer rides.

**NOTE: to replace or change the screws of the windscreen, please check page 55.**

# FURY SEMIFARING

\* Check availability for motorcycle models at [www.puigitechparts.com](http://www.puigitechparts.com) typing in the searching window: FURY

Made specifically for the Harley-Davidson Sportster S, its Batwing style design, inspired by the sharp snout of white sharks, sports a very marked horizontal line that highlights a practically flat upper area that integrates perfectly with the tank and the set of the motorcycle. Therefore, it is ideal for those riders who seek to combine aesthetics and functionality in equal parts.

With the installation of the Fury semi fairing, the amount of air that would impact the rider is reduced, diverting the air cleanly to the sides, avoiding annoying turbulence, which considerably increases riding comfort and reduces fatigue.

The Fury half-fairing is available in two versions: Touring and Sport. The Touring version provides

greater aerodynamic protection, ideal for long-distance rides, while the Sport version is more compact and lightweight, designed for a more dynamic riding style.

DIMENSIONS

**CNC MACHINED**

Machined from billet aluminium and anodized in different colors.

**ADAPTABLE**

Specific available adapters for bike model.

**ADJUSTABLE****KG** 130 gr

The brake lever protector arises from the need to avoid accidental contact with other riders, avoiding the activation of the brakes and the consequent fall. In the design, Puig has prioritized protection and the integration of the protector into the set. For this, a bidirectional adjustment system of the protector, longitudinal and perpendicular to the fist, has been made.

## New!

REF. 22613N

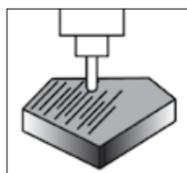

**DIMENSIONS**

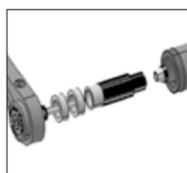

**ADJUSTABLE**

Inclination and height.

**MATERIAL**

Manufactured from billet aluminium and anodized.

**ADAPTABLE**

Specific available adapters for bike model.

An evolution of the successful MP mirror, it features a redesigned housing and arms that deliver a more dynamic and elegant style while retaining its original proportions and the versatile adjustment system that allows installation in both lower and upper handlebar positions.

Manufactured from aluminum with a matte black painted finish, it offers a sophisticated appearance and excellent durability.

Its adaptable design makes it an ideal option for a wide range of motorcycles, not only those with universal handlebars, ensuring functionality, compatibility, and a modern look without compromising performance.

## New!

REF. 21633N

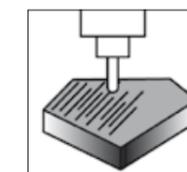

**DIMENSIONS**

**ADJUSTABLE**

Inclination and height.

**MATERIAL**

Manufactured from billet aluminium and anodized.

**ADAPTABLE**

Specific available adapters for bike model.

Machined from a solid block of aluminum and anodized to ensure strength and durability, it offers a perfect combination of functionality, style, and precision.

Mounted at the end of the handlebar, this mirror introduces a new level of adjustability thanks to the ability to tilt the arm without losing rotation relative to the handlebar or the precise ball-joint adjustment.

Its redesigned housing blends refined minimalism with a strong aggressive character, enhancing the motorcycle's overall aesthetics.

Anti-reflective mirror

Convex mirror, magnifying glass effect to increase vision

REF. 22111N

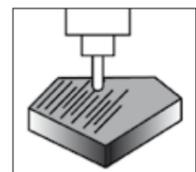

**DIMENSIONS**

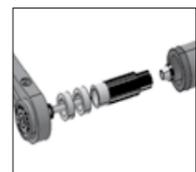

**ADJUSTABLE**

Inclination and height.

**MATERIAL**

Manufactured from billet aluminium and anodized.

**ADAPTABLE**

Specific available adapters for bike model.

Crafted from machined aluminium with an anodized finish, this innovative hybrid mirror blends functionality with design.

Its manual folding system allows for quick adjustment with a single movement, maintaining the chosen position for maximum comfort and visual precision.

It enhances aerodynamics, style, and safety by doubling as a lever protector without compromising the bike's performance.

Puig combines Downforce winglets, an integrated mirror, and the optional TAB indicator. It optimizes aerodynamics and stability using MotoGP and SBK technology.

Made from anodized aluminum, it produces 3 kg of downforce at 250 km/h. The adjustable mirror reduces drag, and the optional indicator integrates seamlessly into the design.

**CNC MACHINED**  
Machined and anodized aluminum cover in black with a design that integrates perfectly into the motorcycle.

**FUNCTION**  
Cover the holes in the fairing when the original mirrors are removed. Specific models for each motorcycle.

On type R motorcycles that will incorporate the turn signal in the mirror, if you want to mount the mirrors with bar end, you need the rearview mirror cover to include a turn signal. In this case, we incorporate our Tab model flasher.

Puig offers a wide range of handguards for those motorcycles that do not have them. Manufactured in a matt black plastic material. They are light, durable and matching your motorcycle lines.

Designed with the best aerodynamic software to protect your hands and

arms from the rain, air and possible small impacts from small rocks or insects.

Adhesive kit is served for certain models of handguards. For some motorcycle models we have a Sport model.

REF. 20378W

VIRTUAL WIND TUNNEL TESTED

Lower pressure ●  
Max. pressure ●

Puig handguard extensions are accessories designed to fit the motorcycle's OEM handguards.

They are ideal for riders seeking optimal aerodynamic protection or looking to reduce wind impact on the arms and shoulders.

These discreet parts have been carefully developed after extensive aerodynamic testing, with the aim of deflecting air, water, and small impacts — such as stones — away from the upper forearms and shoulders.

The result is improved comfort while riding.

Puig offers a line of handguards for scooters and maxiscooters.

Made from highly resistant material, they are lightweight, durable, and feature smooth, discreet lines that blend perfectly with your bike's design.

**F** Dark Smoke    **H** Smoke    **W** Clear

Designed with the best aerodynamic software to protect your hands and arms from the rain, air and possible small impacts from small rocks or insects.

Available in three shades, smoke, dark smoke and clear.

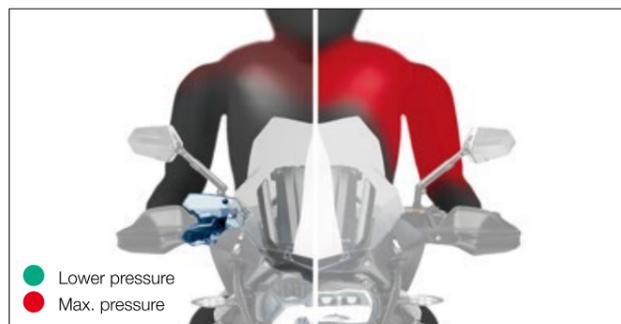

# HANDLEBAR DEFLECTORS

\* Check availability for motorcycle models at [www.puighighparts.com](http://www.puighighparts.com) typing in the searching window: HANDLEBAR DEFLECTORS

Exclusive product for BMW models that allow the direct impact of the air to be diverted on the rider's torso while riding, reducing fatigue and giving the motorcycle a new aerodynamic line. In addition, they protect sensitive parts of the motorcyclist such as the shoulders.

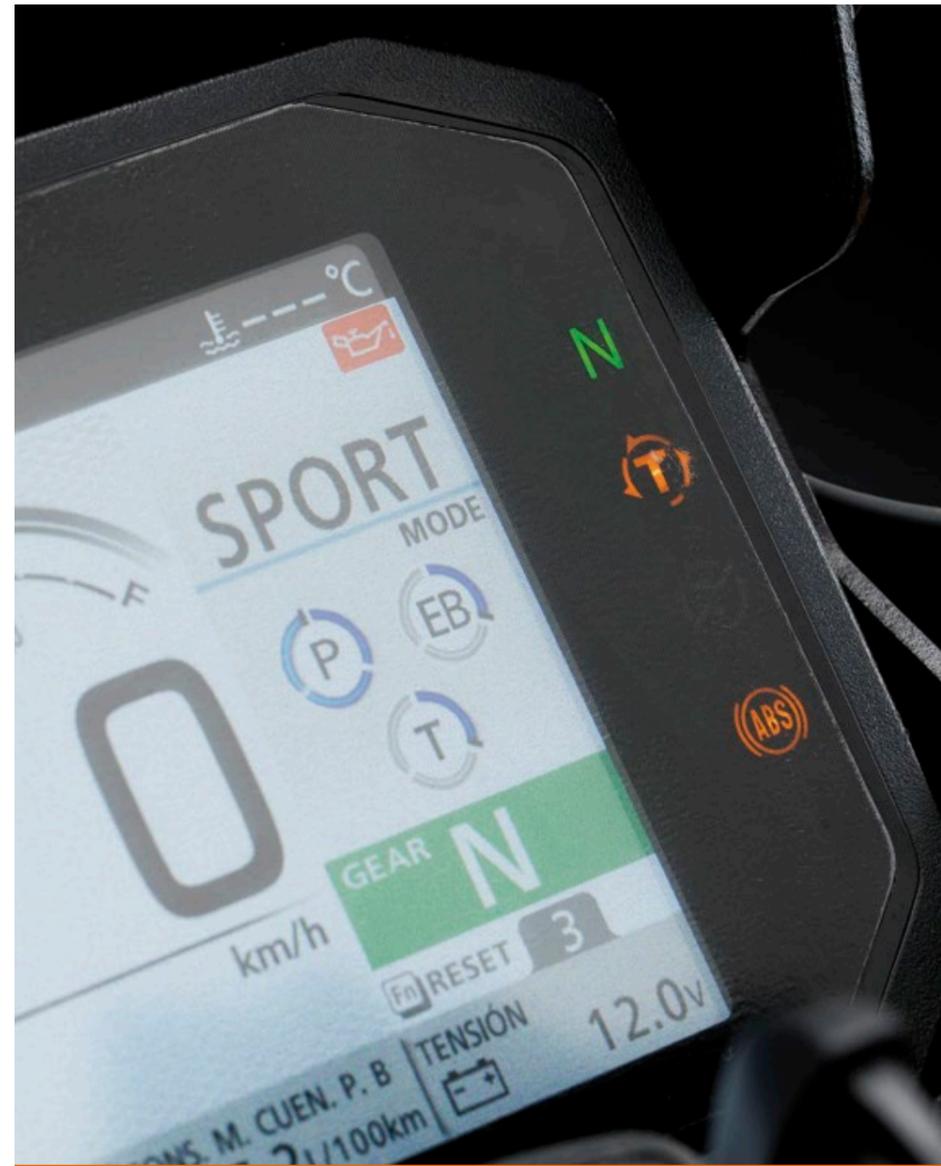

(F) Dark Smoke (H) Smoke (W) Clear

# DASHBOARD PROTECTOR

\* Check availability for motorcycle models at [www.puighighparts.com](http://www.puighighparts.com) typing in the searching window: DASHBOARD

Protect the digital screen of your motorcycle with this practical vinyl. More and more motorcycle models incorporate an LCD screen as an instrument panel, which is why Puig has this protector in its catalog that prevents annoying damage caused by scratches, dirt accumulation and premature wear.

Manufactured specifically for each motorcycle model, the vinyl layer is made of a special material that filters air bubbles, allowing a perfect fit and placement.

- Durable and waterproof self-adhesive vinyl
- Adhesive
- Easy to apply so there are no air bubbles
- Easy to clean
- Anti-scratch treatment
- UV resistant

(W) Clear

# MOBILE PHONE SUPPORT

\* Check availability for motorcycle models at [www.puigitechparts.com](http://www.puigitechparts.com) typing in the searching window: **PHONE HOLDER**

REF. 3836N

## HORIZONTAL SMARTPHONE PHONE HOLDER

Thanks to the Puig phone holder you can use your smartphone as a browser without suffering for its integrity and security. In addition, in our catalog you

will find a line of accessories related to your mobile phone and its protection during journeys of all kinds and with different weather scenarios.

The support will allow you to integrate your phone comfortably and without affecting the final visibility of the road. The locking mechanism adapts to the inches of today's phones. The padded area on the sides and the back, where it rests, improves its grip, and prevents vibration that could affect its operating system.

You can mount the phone holder on the base of the mirror, the mirror rod, on the handlebar and on the seat post of the motorcycle where it will be more immobilized against possible impacts or potholes on the road.

# MOBILE SUPPORTS

\* Check availability for motorcycle models at [www.puigitechparts.com](http://www.puigitechparts.com) typing in the searching window: **MOBILE SUPPORTS**

## SUPPORT TO CENTRAL HOLE YOKE

Universal support for Sport motorcycles. It is fixed in the center of the yoke axle. Allows you to adjust the inclination and lateral movement. It consists of a machined aluminum body in silver or black, with a bar of the same color and a plastic support with an adjustable hemisphere that allows a quick adjustment without tools.

It can be mounted on any motorcycle that has a hole in the yoke axle (or a plug) with dimensions between Ø13 and Ø18, where the stamping pin will pass. Easy to assemble.

Compatible with the mobile phone holder Ref.3836N and the Puig Motoplastic quick-fix covers Ref.3530N and 3531N. Check the compatibility of the motorcycle at Puig website.

Available for a wide range of models, consult adjustability to the motorcycle model in the web.

MODEL	REF.	N P
UNIVERSAL		
SUPPORT TO CENTRAL HOLE YOKE	3756N	(*)

REF. 3534N

## HANDLEBAR

This element allows you to directly adjust the support for the Smartphone to the handlebar of the motorcycle. It is made out of two halves that adjust to each other with the handlebar in between, while they adjusted through a thumbscrew. We also offer different thickness rubber spacers, so that it ends up perfectly adjusted to the motorcycle.

Compatible with the mobile phone holder Ref.3836N and the Puig quick-fix covers Ref.3530N and 3531N.

This part is good for any handlebar that has a diameter of Ø20 until Ø25 mm and just like any of our supports, it is compatible with our cel phone covers.

REF. 3532N

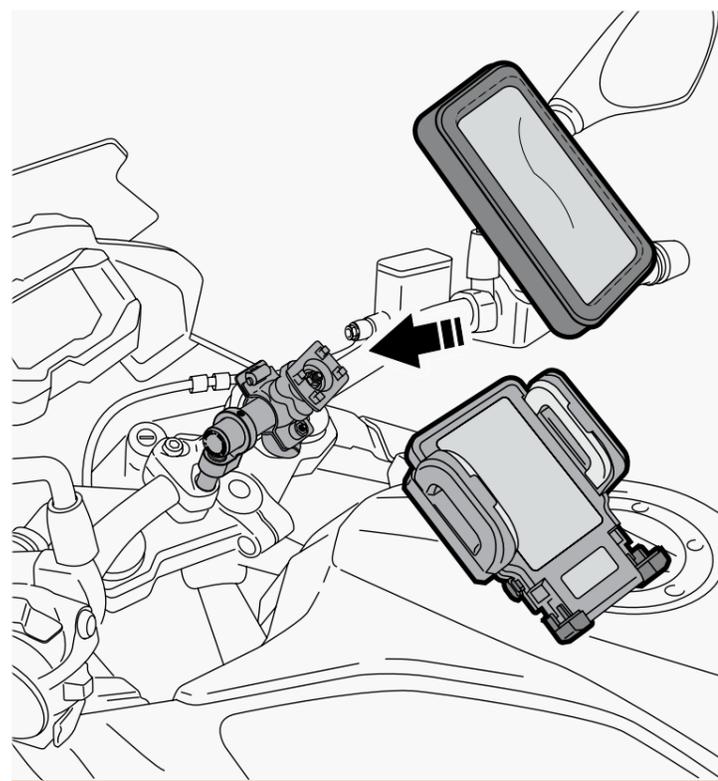

## REARVIEW MIRROR BASE

Support for the rearview mirror base, it is an universal support with complete mobility, 360° and also allows 100% adjustability to guarantee the best view during the ride, so the rider doesn't lose focus of the road.

Compatible with the mobile phone holder Ref.3836N and the Puig quick-fix covers Ref.3530N and 3531N.

The support is made of a metal base and a semi-rigid arm that guarantees a perfect attachment to the base of the rearview mirror. This support is good for all those motorcycle models that carry the rearview mirrors over the handlebars and are also compatible with Puig's covers.

MODEL	REF.	N
UNIVERSAL		
REARVIEW BASE SUPPORT M8/M10	3532N	(*)

REF. 3533N

## REARVIEW MIRROR ROD

A support of easy and quick application, where the plastic cover hugs the rearview mirror rod and it is attached by a thumbscrew. It is offered with different rubber spacers, of different thickness, to adapt it to the different motorcycles needs.

Compatible with the mobile phone holder Ref.3836N and the Puig quick-fix covers Ref.3530N and 3531N.

This support is good for mounting over any rearview mirror with a cylindrical rod of Ø9 until Ø25 and just like the last one it is compatible with our covers.

# HANDHOLDS

\* Check availability for motorcycle models at [www.puigitechparts.com](http://www.puigitechparts.com) typing in the searching window: **HOLDERS**

Improve the comfort and grip of your passengers on the motorcycle with the Puig universal seats. Made of lightweight aluminum and black EPOXY paint, it will be the best complement to improve the passenger journey, taking care of and preserving the aesthetics of your bike to the maximum.

The handles are fixed, by means of screws, to the tank cap of the motorcycle. The model that best fits your vehicle will be determined by the number of screws needed to fix it to the tank cap.

It is recommended that you check the number of screws for fixing the part on your motorcycle before purchasing the product.

# PRO TANK PROTECTOR 2

\* Check availability for motorcycle models at [www.puigitechparts.com](http://www.puigitechparts.com) typing in the searching window: PRO 2

One of the main improvements of the Pro 2 model is that all the bubbles are fully formed, avoiding those that were previously cut off at the edges of the part.

**DIMPLES**  
No cut dimples, increased durability.

**SHAPE SPECIFICALLY DESIGNED FOR EACH MOTORCYCLE MODEL**

The kit includes both side protectors.

The center pad is sold separately: **GRIP TANK PAD (Ref. 22267N)**.

**N** Black

**W** Clear

# TANK GRIP AGARRE

\* Check availability for motorcycle models at [www.puigitechparts.com](http://www.puigitechparts.com) typing in the searching window: TANK GRIP AGARRE

Puig's Grip tank pad stands out for its high transparency, preserving the bike's aesthetics. Made from polyurethane, it is ultra-thin, with only the "dimples" visible to enhance grip, while the rest of the material is almost unnoticeable. It is UV-resistant, does not yellow over time, and has anti-scratch properties.

**Universal Shape Suitable For All Motorcycle Models.**

The perfect complement to specific tank protectors.

# RADIATOR SIDE PANELS

\* Check availability for motorcycle models at [www.puighighparts.com](http://www.puighighparts.com) typing in the searching window: **RADIATOR PANELS**

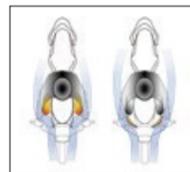

**ABS**

Give a sporty touch to your motorcycle and protect yourself from possible inclement weather with the Puig radiator covers.

Made of ABS, a highly impact resistant material, it protects one of the most sensitive areas of your vehicle.

Radiator covers are available in matt black and carbon look to perfectly match the aesthetic lines of your bike.

These are easy to assemble pieces that are accompanied by instructions, simple and visual, for proper placement.

**PROTECTION**

Protects the rider from inclement weather.

REF. 9371J

REF. 8564C

They cover the radiator's side edges and provide a continuous air flow around the rider's legs.

**C** Carbon Look

**J** Matt Black

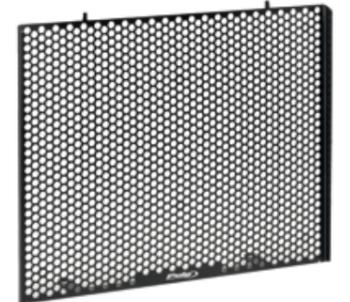

# RADIATOR PROTECTOR

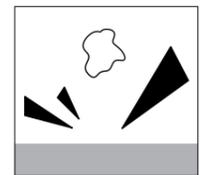

\* Check availability for motorcycle models at [www.puighighparts.com](http://www.puighighparts.com) typing in the searching window: **RADIATOR COVER**

REF. 22091N

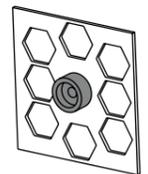

Combines functionality, durability, and style—ideal for those seeking performance without compromising their motorcycle's aesthetics.

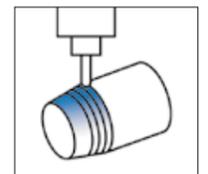

**DURABLE**

Designed to prevent the impact of stones and debris that could damage key components such as the radiator, without compromising engine cooling.

**ANTI-VIBRATION**

Perforated hexagonal pattern design that enhances appearance and optimizes airflow.

**MATERIAL**

Made from high-strength aluminum with a painted textured finish, it provides protection against oxidation and wear.

**N** Black

# BEAK EXTENDER

\* Check availability for motorcycle models at [www.puigitechparts.com](http://www.puigitechparts.com) typing in the searching window: **BEAK**

ABS

REF. 21658J

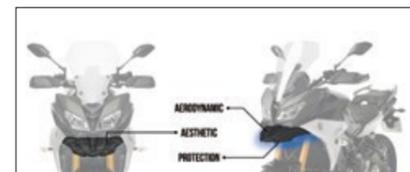

REF. 3837J

This beak-shaped extension protects against splashes and impacts from small objects like stones and insects, both on the road and on dirt trails.

In addition to its protective function, it improves aerodynamics by providing greater support to the front end, resulting in better stability at high speeds.

It is the ideal accessory for trail bikes, allowing for optimal riding performance on both asphalt and off-road terrain.

Thanks to its manufacture in ABS (matt black), a plastic material highly resistant to impacts, this beak extender will perfectly protect the front of the motorcycle.

It is a piece that is easy to assemble, since it does not require drilling holes in the front fender.

J Matt Black

# LOWER DEFLECTORS

\* Check availability for motorcycle models at [www.puigitechparts.com](http://www.puigitechparts.com) typing in the searching window: **LOWER DEFLECTOR**

TÜV ABE 31948 TYP D. Low PMMA ACRYLIC

They adapt perfectly to the lines of the motorcycle thanks to their design and the quality of their finishes, allowing the airflow to be diverted away from the legs and improving riding comfort.

# HEADLIGHT PROTECTOR

\* Check availability for motorcycle models at [www.puigtechparts.com](http://www.puigtechparts.com) typing in the searching window: HEADLIGHT PROTECTOR

- PC** POLYCARBONATE
- IMPACT RESISTANT**
- UV RESISTANT**
- ROUND EDGE**
- SCRATCH RESISTANT**

Protection made of polycarbonate that will perfectly protect our headlight. The steel supports are painted with EPOXY paint, in black, to preserve the original aesthetics of the motorcycle as much as possible.

Manufactured and designed in Barcelona with the highest technologies and materials for a high quality accessory that enhance the performance of your motorcycle and protects it from inclement weather and possible impacts that could scratch or break your front light.

**PROTECTION**  
Avoid impact of objects or insects on the headlight.

(W) Clear

# ADHERE HEADLIGHT PROTECTOR

\* Check availability for motorcycle models at [www.puigtechparts.com](http://www.puigtechparts.com) typing in the searching window: ADHERE

Effective protection of the headlight against the impact of small objects, scratches, dirt, insects and premature wear due to exposure to UV rays. It is made of a high-end 200 micron thick, totally clear polyurethane sheet.

Therefore, it remains unnoticed when installed on the motorcycle without affecting the aesthetics and guaranteeing optimal lighting. It can be installed and uninstalled easily and quickly, without leaving any type of mark, it does not scratch or come off when washed or inclement weather.

- Durable and waterproof self-adhesive vinyl
- Adhesive
- Easy to apply so there are no air bubbles
- Easy to clean
- Anti-scratch treatment
- UV resistant

**STEP 1**  
Clean the headlight by splashing a little water and soaking it well.

**STEP 2**  
Position the headlight protector and center it.

**STEP 3**  
Press from the center to the sides.

(W) Clear

Material: clear adhesive PVC, shaped and designed specifically for each motorcycle model.

	POSITION LIGHTS	FOG LIGHT
CONSUMPTION	2 W	30 W
LUMENS	123 lm	1600 lm
VOLTAGE	DC 10-30 V	
MATERIAL	PC Lenses / Aluminum housing	

With a compact and robust design, the Puig MIST Auxiliary Lights significantly improve visibility during night rides and in adverse conditions such as fog or rain. They feature low-consumption LED technology and a cool white light of 6000-6500K, combined with an aluminum housing and polycarbonate lens to ensure strength and optimal heat dissipation.

Their elegant aesthetics integrate easily into any motorcycle, and they include an impact protector for off-road and mountain use.

## POSITION LIGHTS

CONSUMPTION	60 W (30 W per light)
LUMENS	2200 lm (1100 lm/light)
VOLTAGE	DC 12 V
MATERIAL	PC Lenses / Aluminum housing

Intermediate in size and performance between the Hi-Beam and Hi-Beam 2.0 auxiliary lights, they have the same regulation as the Beam 2.0 model.

The 3.0 version continues to provide an extra lighting, since it improves our vision in different circumstances such as night riding, fog, rain, snow and twisty sections.

They incorporate LED technology to combine power and low consumption, they can be installed easily and safely on motorcycle fenders and are adaptable for 25 mm diameter tubes.

**Due to their size, they cannot be installed on Puig's R19 frame sliders.**

# RESISTOR SET FOR LEDS TURN SIGNALS AND FLASHER RELAYS

\* Check availability for motorcycle models at [www.puigitechparts.com](http://www.puigitechparts.com) typing in the searching window: **RESISTANCES**

## TECHNICAL INFO TURN SIGNALS CONNECTIONS

Most of the bikes use bi-metallic relays. Its frequency (which is the one that sets the pace of the turn signals) depend on the amperage circulating through the circuit. When replacing the turn signals from OEM to aftermarket ones which carry a difference power, consequently they vary the amperage circulation through the circuit that causes a change on the frequency of the turn signals rhythm. If otherwise, the motorcycle uses electronic relay (which frequency works independently from the amperage circulating through the circuit) the change of turn signals from OEM to aftermarket, should not affect the frequency of the turn signals rhythm.

**NOTE:** In case of doubt of what type of relay the motorcycle uses, we recommend to check the turn signal rhythm after switching from OEM to aftermarket.

If the OEM turn signals are replaced by aftermarket ones that use incandescent bulbs, we need to check they use the same power. In case it is different, we need to replace the turn signals bulbs for others that use the same power as OEM ones. On our catalog, we have available bulbs of different power.

If the OEM turn signals are replaced by LED ones (of much less power than incandescent bulbs), we have two options to balance the frequency of rhythm:

**1.** Incorporate a parallel relay in the right circuit and the other on the left circuit. If we replace four turn signals, we need to use a resistance **Part# 42980**.

If otherwise, only two turn signals are replaced (one on each side), we need to use a resistance **Part# 58730**.

The resistances are supplied with a scheme for a parallel connection.

**NOTE:** On most of the bikes, the warning function of the bike is disabled if the resistance is used.

**2.** Identify the intermittent relay of the motorcycle (location and number of pins) and replace it for its corresponding from the list supplied on most of the bikes, the warning functions work correctly when the relay is replaced.

**NOTE:** we can find some motorcycles in the market that do not have an intermittent relay, obviously in this case it cannot be replaced. Moreover, if on the blinking function intervenes more than one relay, it is possible that replacing only one relay does not solve the problem.

**NOTE:** some LED turn signals flash faster than normal when connected to power (it is normal to check the polarity of the cables with the flashing function activated). To verify the actual flashing frequency, remove all power by turning the key to the "off" position and then move to the "on" position to activate the flashing function.

# REAR AREA

## REAR SEAT COWLS

\* Check availability for motorcycle models at [www.puigtechparts.com](http://www.puigtechparts.com) typing in the searching window: REAR SEAT COWLS

Designed to convert the bike into a single-seater while giving it a custom and sporty look, reminiscent of racing motorcycles.

Its carefully engineered design includes internal channels that reduce overall weight and help decrease air turbulence, enhancing the bike's stability, especially at high speeds.

The front section of the tailpiece features a black foam pad for added rider comfort when tucking in at high speed. This part is made of black ABS plastic, matte black, or a strong and lightweight 3 mm carbon-look material.

# KICKSTAND EXTENSION

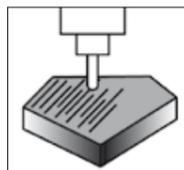

\* Check availability for motorcycle models at [www.puigitechparts.com](http://www.puigitechparts.com) typing in the searching window: **KICKSTAND**

**KG** 90 gr

**DESIGN**  
Kickstand larger base extension.

**CNC MACHINED**  
Machined from billet aluminium and anodized in different colors.

REF. 20193N

REF. 21280N

Provide your motorcycle with greater stability and support surface while it is parked with the new kickstand extension from Puig.

Designed to prevent possible falls of the motorcycle while it is parked. This piece, with a 100% wider base than the original, allows parking on soft or uneven surfaces with greater safety. It is a

mixed piece, with a part in stainless steel and the other machined from an aluminum block with rear anodizing.

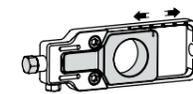

These materials provide great resistance while maintaining a low weight (110-160g depending on the model). This product will prevent the motorcycle from suffering any setback when not in use.

**N** Black

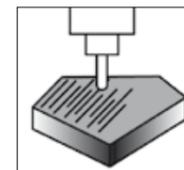

# CHAIN TENSIONERS

\* Check availability for motorcycle models at [www.puigitechparts.com](http://www.puigitechparts.com) typing in the searching window: **CHAIN TENSIONER**

## SHAFT COVER

\* Check availability for motorcycle models at [www.puigitechparts.com](http://www.puigitechparts.com) typing in the searching window: **SHAFT COVER**

REF. 6336N

The Puig belt guard designed specifically for Yamaha T-Max. Available in black, it is made of anodized aluminum of 3 mm. thickness, which gives it the rigidity necessary to protect the driver and the passenger from possible friction, as well as the belt itself from possible blows produced by objects that are in the road. With this component, the maxiscooter has improved its security and at the same time personalizes its sporty and elegant image.

**N** Black

## CROWN COIL

\* Check availability for motorcycle models at [www.puigitechparts.com](http://www.puigitechparts.com) typing in the searching window: **RING TRIM**

The crown ring by Puig reinforces the personality of the Japanese sports scooter, which gives it an outstanding point of differentiation compared to the oem.

Its minimalist design manufactured from billet aluminium, machined with technology and high precision machinery and has an anodized finish of great quality.

It is available in blue, gold, silver and red.

# ENGINE SPOILERS

\* Check availability for motorcycle models at [www.puigtechparts.com](http://www.puigtechparts.com) typing in the searching window: **ENGINE SPOILER**

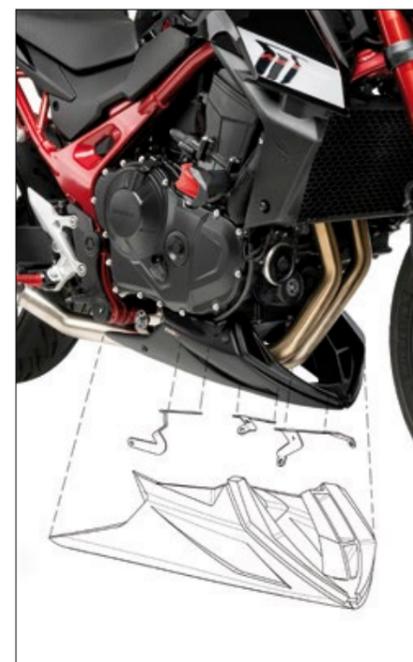

Protect one of the most sensitive parts of your bike with Puig engine spoilers.

Tested in the virtual wind tunnel to achieve a more aerodynamic volume and improvement in stability while riding, they protect the lower area of your bike from possible impacts, dirt, etc.

Manufactured with the highest technologies, its components are made of aluminum and/or ABS materials that are highly resistant to impacts and UV rays, in turn they are light and durable. The plastic parts have a built-in surface treatment that improves the behavior against chemical agents and in turn also offers total protection against UV rays.

This layer avoids the need to have to paint the engine spoiler. The metal supports are made of 2 mm metal, with anti-corrosion treatment, resistant and easy to install. In addition to protecting the motorcycle, Puig engine spoilers are designed to give your bike a more sporty character, so most models come with a sticker kit to customize them. You can find these engine spoilers in two finishes: black or carbon-like.

Easy assembly - 15 minutes.  
No modifications required.  
Check compatibility with other exhaust pipes.

- Black

# OIL-CARTER GUARD

\* Check availability for motorcycle models at [www.puigtechparts.com](http://www.puigtechparts.com) typing in the searching window: **CARTER GUARD**

REF. 21464P

The lower part of the protector is completely flat, which makes it easier to lift the motorcycle from the lower part in the mechanical workshop if necessary, and it has holes to guarantee good cooling and to evacuate water, mud, or small accumulated stones. In addition to facilitating the oil change operation avoiding removing the protector.

The protector is fixed to the lower part of the motorcycle with anti-vibration rubber supports that absorb any possible blows that the protector may receive, distributing the impact force through the different fixing points and, in turn, eliminating possible annoying noises that exist when these rubbers are not being used.

With its installation, valuable and sensitive areas are protected from receiving damage and impacts from stones and mud, such as the crankcase and the union of the headers, even more important if we take into account the Offroad possibilities offered by both models.

Manufactured in Barcelona, it is made of high-end 4 mm.-thick aluminum, resulting in a very resistant piece as well as light, and has a matt silver anodized finish.

It includes specific metal supports with anti-corrosion treatment painted in textured black for a discreet and elegant finish.

## ENGINE GUARD EXTENSION FOR CENTER STAND

Protective plate for the BMW R1300GS, designed to shield the exhaust pipe and complement the Puig engine guard (Ref. 21829). Made of 4 mm aluminum, it is strong, lightweight, and allows for smooth sliding. Its openings ensure proper cooling and drainage. Easy to install with steel brackets that prevent movement.

- Silver

# ENGINE GUARDS

\* Check availability for motorcycle models at [www.puigtechparts.com](http://www.puigtechparts.com) typing in the searching window: **ENGINE GUARD**

Made of steel using high quality machining and precision welds for a perfect fit.

Perfect complement for Trail or Naked type motorcycles, in which the absence of a fairing makes them especially vulnerable to blows in the event of a fall. Improvement in safety and rigidity, in addition to receiving an aesthetic complement that reinforces its image and gives a greater sensation of robustness.

REF. 21192N

**N** Black

Our Beam, Beam 2.0 and Beam 3.0 auxiliary headlights can be mounted on our engine guards.

## ENGINE COVER

\* Check availability for motorcycle models at [www.puigitechparts.com](http://www.puigitechparts.com) typing in the searching window: ENGINE COVER

Manufactured in 4 mm thick polypropylene for strength, durability and good appearance. The covers are simply bolt-on on the oem engine case.

Compact for a maximum distance to the ground, matt finished, and protecting one of the most vulnerable areas of the machine.

**N** Black

## ENGINE COVER TRACK FOR CHAMPIONSHIP

\* Check availability for motorcycle models at [www.puigitechparts.com](http://www.puigitechparts.com) typing in the searching window: ENGINE TRACK COVER

Part included in the list of FIM 2025 eligible competition parts.

Made of 4 mm polypropylene that provide great resistance to impacts and abrasion, as well as offering the maximum possible lightness.

With its installation, the most exposed parts of the engine are protected in case of falls and dragging.

**Caps with wear warning approved by the International Motorcycle Federation (FIM), Suitable for professional riding.**

# BRAKE COOLERS

\* Check availability for motorcycle models at [www.puighighparts.com](http://www.puighighparts.com) typing in the searching window: BRAKE COOLER

REF. 21453J

The brake cooler has been designed with high-performance demands in mind, especially in sporty riding conditions where the braking system is pushed to its limits—such as on the track, with hard and continuous braking, and even more so during hot weather. This can lead to overheating, reducing performance and brake feel.

It consists of two high-end ABS plastic covers, one for each disc and caliper set, forming a channel that captures, compresses, and accelerates airflow to direct it straight onto the brake pads and disc. This results in an average temperature drop of ten degrees, as proven in track tests, preventing overheating and allowing the system to work optimally.

Its refined design not only adds a sportier and more customized look, but also eliminates turbulence around the front wheel by creating a partial lenticular cover, improving the bike's aerodynamics, especially at high speeds.

It includes strong yet lightweight aluminum brackets with a discreet textured black finish.

Our brake cooler channels more air thanks to a larger intake opening compared to competitors. Its unique aesthetic design, combined with the aerodynamic advantage of partially enclosing the front wheel, ensures proven efficiency and superior performance.

- Matt Black
- Black

# BRAKE COOLER 2.0

\* Check availability for motorcycle models at [www.puighighparts.com](http://www.puighighparts.com) typing in the searching window: BRAKE COOLER 2.0

It represents the evolution of current brake coolers by separating the assembly into two smaller, independent components, as seen on most MotoGP and WorldSBK motorcycles, offering greater mounting flexibility.

Version 2.0 integrates both components—the Air Duct and the Wheel Aero Deflector—and consists of four parts, designed to deliver maximum braking performance together with a more complete and aggressive appearance.

Available in gloss black, matte black, and carbon-look finishes.

TÜV
ABE 31948
TYP B. Cooler
METALIC MADE
ABS 3 mm
AERODYNAMIC
IMPACT RESISTANT
UV RESISTANT

Improve braking performance and safety with the Puig Wheel Aero Deflectors, developed in Barcelona to optimize airflow around the brake calipers and provide more precise and stable riding.

Manufactured using advanced plastic molding technologies, the set consists of two aerodynamic deflectors that channel air efficiently toward the brake area. They include lightweight and durable stainless-steel brackets with a textured black finish, perfectly integrated into the motorcycle's sporty design.

The Wheel Aero Deflectors help reduce brake temperatures by an average of 10°C, improving braking efficiency, consistency, and feel even under demanding riding conditions. Their aerodynamic design guides airflow efficiently without generating additional turbulence.

Quick and easy installation. An effective solution for cooler, more stable, and more precise braking in any situation.

# AIR DUCT

\* Check availability for motorcycle models at [www.puigtechparts.com](http://www.puigtechparts.com) typing in the searching window: **AIR DUCT**

TÜV
ABE 31948
TYP B. Cooler
METALIC MADE
ABS 3 mm
AERODYNAMIC
IMPACT RESISTANT
UV RESISTANT

The Air Duct has been developed to optimize braking system performance, ensuring more consistent and safer braking even under the most demanding conditions.

During sporty riding or at high temperatures, it helps reduce brake caliper temperature by an average of 10°C, improving braking efficiency and feel.

The system consists of two cooling ducts manufactured in Barcelona using advanced plastic molding technologies, along with steel brackets featuring a textured black finish that provide rigidity and durability. Developed in collaboration with the MotoGP team Honda HRC and Puig, it brings racing technology to street motorcycles.

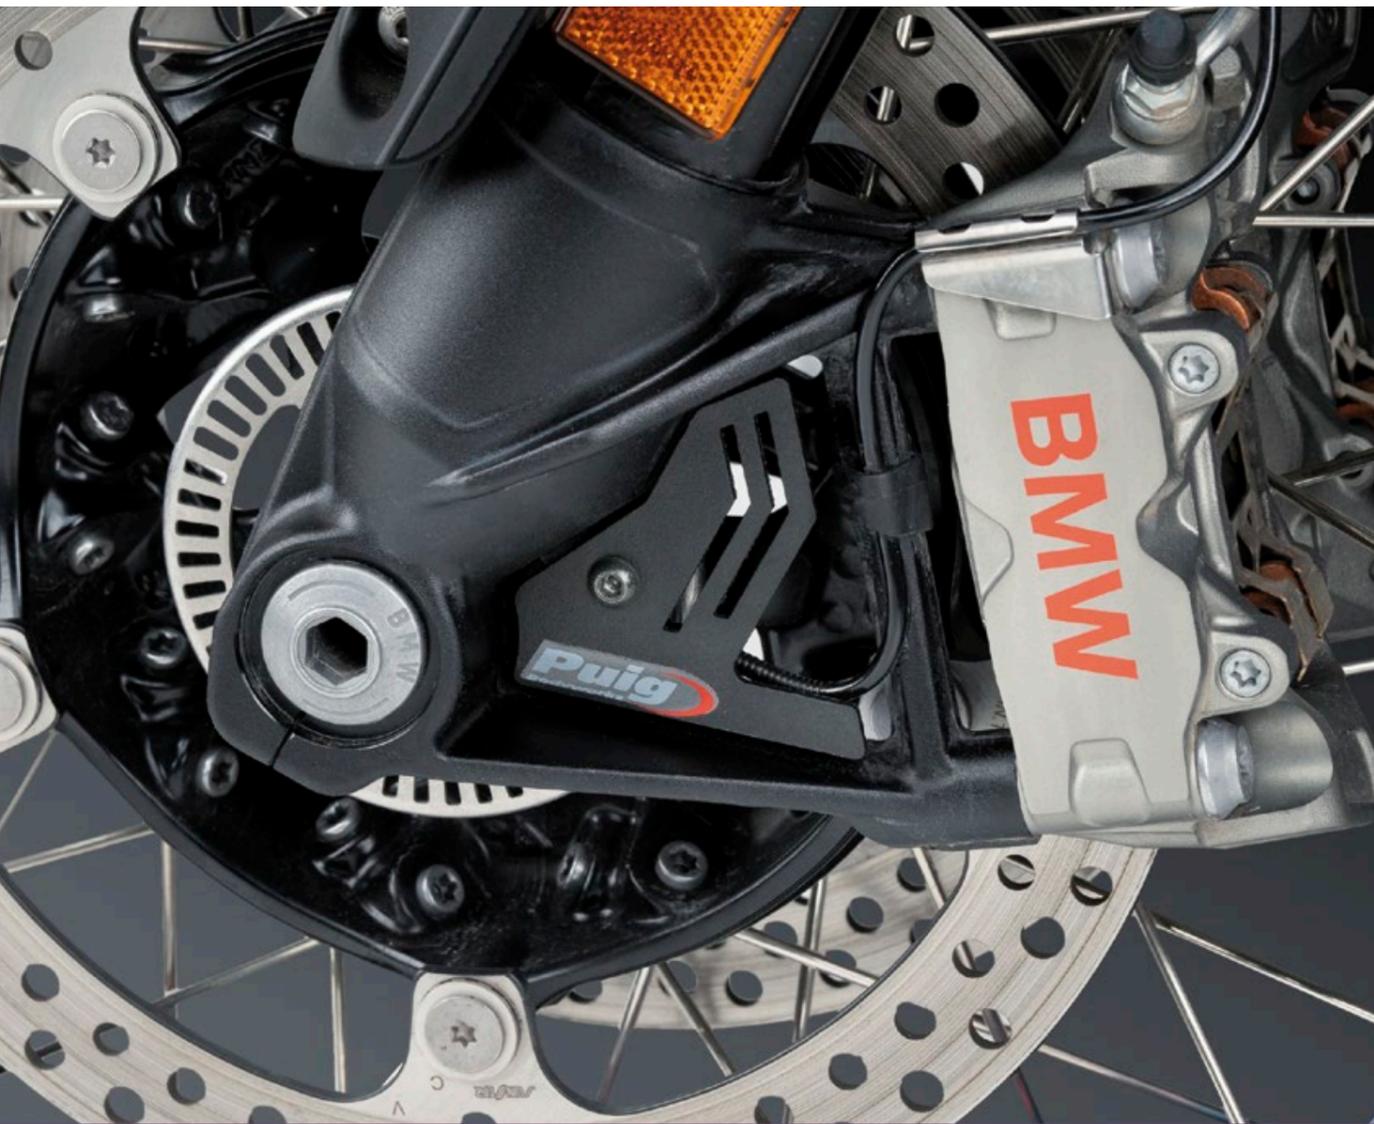

Its aerodynamic design channels air directly toward the calipers, preventing overheating and ensuring stable performance. Installation is quick and easy by following the included instructions or those available online.

## REAR PADDOCK STAND FOR CONVENTIONAL SWINGARM FM1

The maneuvering stand is the perfect tool for those who need to lift the rear wheel and move the motorcycle with total ease and control. Designed to provide comfort and precision, it allows the bike to be moved effortlessly, even in tight spaces.

It features a system that allows the stand's wheels to be locked, keeping it securely fixed in position when needed, adding an extra level of safety during maintenance tasks or parking. Its robust structure ensures reliable use, while its intuitive handling makes it suitable for users of any experience level.

Thanks to its four main wheels, specifically designed to improve mobility, this stand provides smooth, stable, vibration-free maneuvering, making it an essential accessory for keeping the motorcycle fully under control.

## STAND FOR SINGLE-SIDED SWINGARM ST1

The rear wheel stand is the ideal solution for those looking to combine lightness, robustness, and maximum stability when lifting their motorcycle. Its high-end design ensures reliable performance both for maintenance tasks and everyday use.

Manufactured from aluminum, it stands out for its ultra-lightweight structure without compromising strength. It incorporates rubber wheels integrated into the stand itself, making maneuvering easier and ensuring smooth and precise movement.

Designed so that any user can assemble it without complications, this stand offers a complete sense of security when lifting the motorcycle: it shows no play or vibrations, providing firm and stable support at all times.

An essential tool for those seeking quality, comfort, and confidence with every use.

# DELIVERY

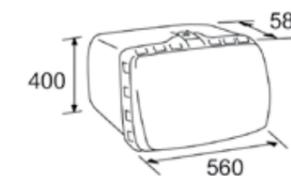

**Motoplastic-Puig** has a blowing division specialized in the manufacture of special trunks for the delivery sector and supports for the best-selling scooters. Presented in different formats and sizes to meet all transportation needs. They are made of polypropylene with high resistance to impact and with a certificate of suitability for contact with food. Its manufacturing system guarantees an excellent ratio between the weight of the trunk, its load capacity and shock absorption. They come in three colors and with a locking system that allows its use with or without a key. As they are references of considerable volume and as they are shipped directly from the manufacturing plant, the shipping costs will be billed separately, even if the amount paid is reached for orders over € 1,000 gross.
